Parameta Solutions partners with Surperformance to broaden Global access to its Interest Rate Swap Indices

LONDON, 18 March, 2026 – **Parameta Solutions**, the data and analytics division of **TP ICAP Group**, today announced a partnership with Surperformance, the operator of [Zonebourse.com](https://zonebourse.com) and [Marketscreener.com](https://marketscreener.com), to significantly expand global access to its EUR and USD Interest Rate Swap Indices. The indices are widely used as reference rates across a broad range of investment products and risk management applications.

Parameta Solutions' Swap Rate Indices

Parameta Solutions Swap Rate Indices provide a transparent, daily snapshot of EUR and USD interest-rate swap markets. They are relied upon across the financial ecosystem, from banks structuring interest-rate-linked products and insurers managing long-term liabilities, to asset managers supporting valuation, portfolio analysis, and risk management.

Built on high-quality transaction data from TP ICAP's leading interdealer broker desks, the indices are calculated using a robust methodology that delivers an 11am fixing. This provides market participants with a reliable foundation for pricing, hedging, and product design.

Launched with Société Générale as an anchor client, the indices were quickly adopted by major European and US banks and approved for use by leading insurance companies. Their uptake demonstrates strong market demand for transparent benchmarks that reflect OTC market conditions.

"Our approach at Parameta Solutions is grounded in delivering high-integrity benchmarks. Partnering with Surperformance enables us to scale access to our swap rate indices, allowing more market participants to build on high-quality, data-driven foundations. This collaboration supports our long-term goal of democratising access to robust OTC market benchmarks, reducing friction, and strengthening trust in reference rates. Ultimately, it helps institutions, issuers, and investors make better decisions in a complex interest rate environment."

Silvina Aldeco-Martinez, Chief Executive Officer, Parameta Solutions

A Strategic Role for Surperformance

Under the partnership, Parameta Solutions' Interest Rate Swap Indices will be published on [Zonebourse.com](https://zonebourse.com) and [Marketscreener.com](https://marketscreener.com), significantly enhancing their visibility and accessibility for both institutional and retail market participants.

As swap rate indices underpin the wide range of financial structures, ensuring stable, long-term access to them is critical. Surperformance provides a neutral, scalable, and unified distribution infrastructure, enabling frictionless access to critical index data.

"By publishing Parameta Solutions' indices on MarketScreener.com and Zonebourse.com, Surperformance continues to strengthen its role as a strategic hub for financial information. Our unified and neutral infrastructure simplifies access to critical market data for institutional players, private investors, and issuers."

Franck Morel, Chief Executive Officer, Surperformance

Professional Usage Terms

Professional use of the index access URL, including incorporation into product documentation, commercial materials, or contractual disclosures such as term sheets, brochures, or addenda, requires a prior formal agreement with Surperformance.

About Parameta Solutions

Parameta Solutions' Benchmarks & Indices team leverages TP ICAP's unique OTC derivatives data, sourced from the world's largest interdealer broker, to deliver robust, transparent indices that provide insight into complex and traditionally hard-to-price markets.

Parameta Solutions is authorised as a benchmark administrator by the UK Financial Conduct Authority.
