

Capital Markets Indicative Data

TP Interest Rate Options (Global Premium)

Background

Interest Rate Options Data Packages from TP are primarily derived from observations made by our regional IRO desks. Our brokers are equipped with tools to identify the best-fitting SABR parameters based on real-time market activity. They also calibrate an extensive at-the-money volatility grid using their observations.

Rising and fluctuating interest rates, along with ongoing uncertainty in global economic conditions such as inflationary pressures and geopolitical tensions, have been key drivers in the growth of the IRO market. As market participants seek more sophisticated tools to manage volatility and hedge risk, demand for high-quality, transparent data has grown significantly.

Key Benefits

- **Observable, Indicative Rates:** Independent and reliable prices so that traders can execute with confidence whilst risk managers can monitor, identify, measure, analyse, and mitigate market risk with reliable inputs.
- **Comprehensive Coverage:** Over 245,000+ records and 29 currencies covering volatility surfaces, premiums and strikes for over 20 instrument types. Swaption skews are typically +/- 400bps*, so that clients have access to pricing even for illiquid out-of-the-money tenors.
- **Broad Analytics Coverage:** Analytic fields supported include spot and forward premiums, forward strikes, lognormal volatility, normal volatility (both annualised and daily), so that traders can choose the best view/strategy suitable for their trading style.

*skew strikes, fields, and tenor expiries may vary per currency

Use Cases

- **Hedging Needs:** Corporations and financial institutions can use our reliable pricing for price discovery to protect against interest rate fluctuations or hedge existing IRS positions.
- **Valuation Control:** Valuation teams can use our reliable pricing as an addition source to perform independent price verification to ensure that their securities and inventory are held at fair value.
- **Model Calibration:** Being able to create good quality data in terms of the forward curves, implied vols and premium will help our customers avoid a lot of the time-consuming work that goes into sourcing underlying curves and the calculations required to turn the data into a volatility surface.

Update Frequency

Real-time, intraday and end-of-day

Coverage

Record Count	245000+
Regions	Americas, APAC, EMEA
Sub-Asset Types	Swaptions, Cap/Floors and Constant Maturity Swaps
Currencies	Americas: USD, CAD APAC: AUD, CNH, CNY, HKD, IDR, INR, JPY, KRW, MYR, PHP, SGD, THB*, TWD* EMEA: AED, CHF, DKK, EUR, GBP, HUF, ILS, NOK, PLN, SAR, SEK, TRY, ZAR
History Start Date	variable, data as far back as April 2006
Brands	TP
Field Count	variable
Direct Delivery options	via API, streaming or FTP channels
Cloud Delivery	multiple solutions including AWS and Snowflake
Third party/channel options	Bloomberg, LSEG
Reporting frequency (Only required for indices)	n/a
Update frequency	Real-Time, Intraday and End of Day

*includes both deliverable and non-deliverable markets
